

Development Engineer, several positions

Junior SW Development Engineer

Senior SW Development Engineer

We are seeking skilled and motivated Development Engineers to join our dynamic team. As a Development Engineer, you will play a crucial role in the design, development, and implementation of internet networking infrastructure including our Coax Link Controllers, DPUs (Distribution Point Units) or Element Management System.

Responsibilities:

- Collaborate with cross-functional teams, including product management, architects, and fellow engineers, to design and develop cutting-edge internet networking infrastructure solutions.
- Take a leading role in the development and customization of product solutions, depending on your area of expertise.
- Contribute to all stages of the software development lifecycle, including requirements gathering, design, implementation, testing, and deployment.
- Participate in architectural and technical discussions, providing valuable insights and recommendations to ensure the scalability, performance, and reliability of the solutions.
- Conduct thorough testing and debugging of the developed systems, identifying and resolving any issues or defects.
- Collaborate with internal and external stakeholders to gather feedback, incorporate enhancements, and continuously improve the products.
- Stay up-to-date with the latest industry trends, technologies, and standards related to internet networking, and actively contribute to the technical knowledge within the team.

Requirements:

- Relevant engineering degree.
- Proven experience as a Development Engineer, Software Engineer, or similar role, preferably with a focus on internet networking infrastructure.
- Knowledge and experience with Linux-based systems in general. Experience of OpenWRT is a plus.
- Proficiency in programming languages such as C/C++, Python, PHP or Java.
- Solid understanding of networking protocols, standards, and technologies.
- Experience with software development methodologies, version control systems, and issue tracking tools.
- Strong analytical and problem-solving skills, with the ability to work independently and as part of a team.
- Excellent communication and collaboration skills, with the ability to effectively convey technical concepts to both technical and non-technical stakeholders.

Join InCoax Networks and be part of our dynamic team, working on cutting-edge internet networking infrastructure solutions. Contribute your expertise and shape the future of broadband access. Apply
