

Requirements Engineer

We are currently seeking a talented and motivated Requirements Engineer to join our team. In this role, you will play a crucial part in defining and documenting requirements for our products. This position can be based in Lund or Gävle depending on your choice. There may be limited traveling to customers and development partners, but if you are placed in Lund you are expected to visit the Gävle office approximately once a month. You will report to the Head of Development who is based in Lund.

Responsibilities:

- Collaborate with cross-functional teams including product management, system architects, and development engineers to understand customer needs and translate them into clear and concise technical requirements.
- Conduct in-depth analysis of InCoax products to identify functional and non-functional requirements.
- Define and document detailed specifications, use cases, and system requirements to guide the design, implementation, and verification of our products.
- Ensure compliance with industry standards and best practices.
- Work closely with stakeholders to prioritize and validate requirements and ensure their successful implementation.
- Act as a subject matter expert, providing guidance and support to the development teams throughout the entire project lifecycle.
- Collaborate with testing and quality assurance to verify that requirements are met, and participate in the resolution of any issues or defects.

Requirements:

- Relevant engineering degree.
- Proven experience as a Requirements Engineer or similar role, with a focus on internet networking infrastructure.
- Solid knowledge of networking protocols, standards, and technologies.
- Proficiency in requirement management tools and methodologies.
- Excellent analytical and problem-solving skills, with the ability to translate complex concepts into clear and concise requirements.
- Effective communication and collaboration skills, with the ability to work effectively in cross-functional teams.
- Attention to detail and the ability to prioritize and manage multiple tasks in a fast-paced environment.

If you are passionate about internet networking infrastructure and possess the skills and expertise to excel in this role, we would love to hear from you. Join our dynamic team and contribute to shaping the future of connectivity. Apply now with your resume and a cover letter highlighting your relevant experience and achievements.
